Reagan Li (Li Gen)

Phone: +86 134-5601-5640 | Email: reagan007@163.com | Location: Shenzhen, China
Hometown: Wenzhou, Zhejiang | DOB: Nov 2002 | Member of the Communist Party of China

EDUCATION

Southern University of Science and Technology (SUSTech), Shenzhen Sep 2025 – Jul 2027
M.S. in Finance, School of Business GPA: 3.66/4.0

Core Courses: Quantitative Investment (A+), Financial Time Series Analysis (A-), Mathematical Finance (A+), Financial Derivatives (A-), Advanced Financial Risk Management (A+), Investment (A-), Game Theory & Behavioral Finance (A+), Deep Learning & Large Models (A+), AI & Quantitative Finance (B+), Financial Statement Analysis (A-), Data Science & Business Analytics (A+), Advanced Corporate Finance (A-)

- Honors: Special-Class Academic Scholarship; Special-Class Research Assistant Stipend

Qinghai University, Xining Sep 2021 – Jun 2025
B.A. in Finance (CFA Track), School of Finance & Economics Rank: 1/107 | GPA: 4.53/5.0 (93.5/100) | CET-6

Core Courses: Corporate Finance (98), Securities Investment (98), Money & Banking (96), Fixed-Income Securities (94), International Finance (93), Financial Engineering (92), Investment Banking (94), Intermediate Financial Accounting (95), Econometrics (95), Statistics (96), Advanced Mathematics (98), Linear Algebra (97), Probability & Statistics (95), Database Applications (94)

Honors: Yingcai Scholarship, Research & Innovation Scholarship, Outstanding Student Scholarship, Merit Student, Outstanding Student Leader, Outstanding Graduate

Technical Skills: Python, Stata, SPSS, MATLAB, C, EViews, Microsoft Office; Bloomberg & Wind data terminals

Certifications: Securities Practitioner, Futures Practitioner, Fund Practitioner, Junior Accountant

INTERNSHIP EXPERIENCE

Guoyuan Securities Co., Ltd. Jul 2026 – Sep 2026
Buy-Side Investment Advisory Intern, Yuanhui Program

- Client asset allocation: built weekly in-depth profiles of simulated clients (age, occupation, income, risk profile, investable assets) and comprehensive allocation plans; diagnosed concentration and overtrading issues and constructed four-tier plans (cash management – fixed income – fixed income-plus – equity) covering financial products and margin financing.
- Research output: authored monthly industry research reports covering industry logic, valuation and stock-level positioning.
- AI workflow: automated fixed-format tasks (drafting meeting minutes, processing data, formatting reports), freeing time for analysis and final writing.
- Portfolio practice: constructed and monitored a simulated portfolio, tracking holdings and performance.
- Client shadowing: shadowed advisors on retail and institutional client visits and participated in allocation roadshow drills.
- Product research: compared low-risk, stable-return products (yield certificates, quoted repurchase, cash management) and produced product recommendation documents for the company's marketing and promotion.
- Announcement monitoring: tracked listed-company announcements, filtering for value signals (investment, product-purchase, employee-ownership).

China Merchants Futures Co., Ltd. Apr 2026 – Jul 2026
Quantitative Research Intern, Industry Research Division

- Factor research: reviewed the WorldQuant Alpha101 factor library, excluded cross-sectional factors, and selected 19 time-series price-volume factors suited to futures timing.
- Backtest validation: wrote backtesting code with rolling-quantile dynamic thresholds (252-day lookback, refreshed every 63 days) for gold and 5/10/30-year treasury futures, running parameter grid searches and in-/out-of-sample validation.
- Parameter optimization: selected configurations against an out-of-sample/in-sample Sharpe ratio > 0.6 criterion; 12 passed robustness tests, with the best reaching a Sharpe ratio of 2.32; independently produced the backtest report.
- Data analysis: performed daily-frequency cleaning, descriptive statistics and cross-asset analysis on gold and 2/5/10/30-year treasury futures to support factor suitability assessment.
- Platform survey: benchmarked 9 backtesting platforms across futures support, data granularity and deployment; identified the team's replacement backtest solution.
- Automation: built an automated data-update and AI-drafting workflow that cut daily-report production from about 30 minutes to under 5.
- Market commentary: assisted in drafting daily gold-market notes on price trends and drivers; proficient with Wind/Bloomberg terminals.

Pan-China Certified Public Accountants LLP (Hangzhou HQ) Jan 2025 – Apr 2025
Audit Intern

- Annual audits: participated in the annual audits of Transsion Holdings and Jinshi Resources and the Yulong Optoelectronics IPO; independently prepared working papers for cash, receivables/payables and P&L accounts of 3 Transsion overseas subsidiaries.
- Data analytics: used Python scripts with Excel to batch-verify financial data, flagging anomalies and errors; gained exposure to IT-audit Python data-extraction methods.
- Independent ownership: completed the full-scope audit of Jinshi's mining subsidiary as a two-person team with one staff auditor, covering voucher review, fixed-asset counts, weighbridge-ticket checks, two-way bank-deposit testing and cut-off testing.
- IPO verification: checked executives' complete three-year statements across 17 banks; uncovered a dormant account at a bank reported 'never opened' by one executive, traced the full flows and reported to the engagement lead, with the account confirmed as normal personal transfers.
- Cycle testing: performed Transsion sales-and-collection cycle testing, processing English- and Arabic-language customs declarations and bills of lading to trace export transactions.
- Working papers: bank-confirmation checks and issuance statistics, AR alternative tests, subsequent-event tests, cross-period checks and report-note reconciliation; checked and filed audit working papers.

RESEARCH EXPERIENCE

Master's Thesis — Digital Tax Administration and Executive Excess Perquisites — Evidence from the Blockchain E-Invoice Pilot · *Sole Author* 2026 – Present

- Research design: uses the blockchain e-invoice pilot as a quasi-natural experiment to study the governance effect of digital tax administration on listed firms' executive excess perquisites.

Outstanding Thesis — Capital Market Liberalization and Minority Shareholder Protection — Evidence from the Shanghai-Hong Kong Stock Connect · *Sole Author* Nov 2024 – May 2025

- Research design: built a multi-period difference-in-differences (DID) model using the Stock Connect launch as a quasi-natural experiment to test whether capital-market opening disciplines controlling-shareholder tunneling; found a significant reduction in tunneling.
- Completed robustness checks, mechanism analysis and heterogeneity analysis; awarded university-level Outstanding Thesis.

Independent Paper — Insurance Market Development and the Urban-Rural Income Gap: Dual Effects · *Sole Author* Mar 2024 – Aug 2024

- Method: applied cointegration tests and a vector error correction model (VEC) with impulse response and variance decomposition to analyze how insurance market development affects the urban-rural income gap.
- Findings: higher insurance density narrows the gap while higher insurance penetration may widen it, with lagged effects.

Advisor's Project — CPA Mobility Database for Accounting Firms · *Data Lead* Apr 2026 – Jun 2026

- Data acquisition: collected 887 multi-format disclosure files (doc/xls/PDF/scans) from provincial institutes of certified public accountants.
- Data engineering: built an OCR + LLM extraction pipeline with 3-way API cross-validation, reconstructing each CPA's yearly firm affiliation with over 98% roster accuracy.

Qinghai Financial Society Research Project — Impact of Digital Finance Development on the Credit Channel of Monetary Policy — Evidence from Listed Companies · *Empirical Lead* Apr 2024 – Nov 2024

- Modeling: constructed fixed-effects models on 2011–2021 commercial-bank and A-share listed-company panel data.
- Findings: traced how digital finance affects monetary-policy credit transmission via the bank-lending channel and the corporate balance-sheet channel; contributed to the concluding report.

English Paper (CPCI) — Study on the Influence of Weathering Process on the Chemical Composition of Ancient Glass Based on CLR · *First Author* Feb 2023 – Jul 2023

- Method: processed compositional data with Centered Log-Ratio (CLR) transformation to link ancient-glass chemistry to weathering processes.
- Output: accepted by an international CPCI conference; first author of three, responsible for data analysis and the initial draft.

National Social Science Fund (Western Project) — Correlation between Regional Public Brands of High-Altitude Specialty Agriculture and Modernization of Smallholder Farmers · *Empirical Lead* Jul 2023 – Jun 2025

- Questionnaire design: built scales covering 5 dimensions and 25 indicators, completed pilot revision plus reliability and validity testing.
- Empirics: applied Structural Equation Modeling (SEM) to test how regional public brands drive smallholder modernization; contributed to the final research report.

Qinghai Social Science Fund — Human-Resource Guarantee and Public Participation in Improving Governance under the 'One Excellence, Two Highs' Strategy · *Empirical Lead* May 2022 – Feb 2023

- Indicators: constructed a 22-indicator evaluation system for Qinghai's governance capacity and human-resource reserve.
- Analysis: ran correlation and regression analyses on 2011–2020 data to underpin policy recommendations.

Qinghai Development & Reform Commission — Indicator Target System for Qinghai's Economic and Social Development in the 15th Five-Year Plan · *Lead Contributor* Sep 2024 – Nov 2024

- Led indicator selection, definitions and target forecasting for the economic and social development indicator system.

Qinghai Provincial Statistics Bureau — Analysis of Child Population Development in Qinghai's Seventh National Population Census · *Lead Contributor* Oct 2022 – Nov 2022

- Data: cleaned, aggregated and cross-checked child-population records from the census.
- Analysis: prepared charts on the scale, structure and trends of the child population.

COURSE PROJECTS

Quantitative Investment: Multi-asset adaptive dynamic grid strategy — all-weather allocation across STAR 50 / Nasdaq / gold ETFs with three grid layers, asymmetric EGARCH volatility forecasting and dual-cycle MACD timing; 7 optimizations targeting one-sided breakouts, rigid parameters and capital efficiency, delivered as a 21-page strategy report.

Deep Learning & Large Models: POMO neural TSP solver (dual-model ensemble) — DPO-style preference-learning post-training with curriculum learning alongside LKH3 expert-trajectory behavior cloning; 0.478% optimality gap on the TSPLIB holdout set, a 76.7% relative improvement over the POMO baseline.

Data Science & Business Analytics: Credit-card default prediction (Kaggle) — 30,000 samples and 25 variables; performed feature engineering and benchmarked logistic regression, random forest, GBDT and XGBoost, with gradient boosting reaching an AUC-ROC of 0.78 under cross-validation.

Financial Time Series Analysis: Technical-analysis validity test — DTW matching of 55-day K-lines across all SSE 50 constituents against 10 classical chart patterns, plus VAR with Granger causality and impulse-response analysis; strictly executed pattern strategies significantly underperformed the benchmark.

Derivatives: Rolling risk management for futures contract rolls — analyzing the Bank of China crude-oil rollover case, designed a three-layer progressive hedging scheme: forward spread locks, synthetic spread forwards and futures-option combinations.

Advanced Corporate Finance: A-share dividend research — full-market CSMAR statistics for 1991–2024 on payout scale and ratios, with a literature review and causal identification design in the context of the new 'Nine Guidelines'.

HONORS & AWARDS

- 1st Prize, 7th 'China Merchants Futures Cup' Futures Training Camp Dec 2025
- Awarded after theoretical and live-trading assessments at a camp co-hosted by the Shenzhen Futures Association and China Merchants Futures (top 3 among 150+ trainees).
- National 2nd Prize, China Undergraduate Mathematical Contest in Modeling (team captain) Sep 2022
- Produced the paper 'Composition Analysis and Identification of Ancient Glass Artifacts'; led the overall modeling design and Python implementation, applying chi-square tests, cluster analysis and discriminant analysis to identify glass types.
- 2nd Prize (Honorable Mention), Mathematical Contest in Modeling (MCM/ICM, team captain) Feb 2023
- As captain, designed the modeling framework and coordinated the writing of the English paper from solution to submission.
- 1st Prize, Huashu Cup National Mathematical Contest in Modeling (team captain) Aug 2023
- Produced the paper 'Effects of Maternal Physical and Mental Health on Infant Development and Optimal Treatment Plan'; built XGBoost prediction and nonlinear programming models, performing machine-learning training and optimal-solution search in Python.
- National 2nd Prize, 'Wuyi Cup' Mathematical Contest in Modeling (team captain) May 2023
- As captain, led model selection and coding, delivering the paper within the time limit.
- National 3rd Prize, China Undergraduate Market Research & Analysis Competition (technical lead) Apr 2023
- Produced the report 'From Grocery Basket to Prepared Plate — Factors Influencing Consumers' Willingness to Purchase Prepared Dishes Based on SEM and fsQCA'; designed the questionnaire based on the Theory of Planned Behavior and completed the empirical analysis.
- National Bronze Award, China International College Students' Innovation Competition (finance lead) Dec 2023
- 2 Provincial Silver Awards (finance lead) & 1 Provincial Bronze Award (project collaborator), 'Internet+' Innovation & Entrepreneurship Competition Oct 2023 / Oct 2022
- Provincial 2nd Prize, 'FLTRP·Guocai Cup' English Writing; University 1st Prize, English Reading Oct 2022

OTHER EXPERIENCE

Student Leadership 2021 – 2025

Study Committee Member & Information Officer (CFA class) — organized class learning affairs and information updates; also shouldered day-to-day class affairs and activity coordination.

Program Assistant & TA (SUSTech) Spring – Fall 2026

Sci-Tech MBA program assistant (Spring 2026 — operations, administration, event organization); Teaching Assistant for Strategic Management (Summer 2026) and Business Ethics & CSR (Fall 2026) — grading, Q&A and classroom support.

Teaching Assistant (Undergraduate) 2022 – 2023

Political Economy — homework grading, Q&A support and teaching-material preparation.

Research Assistant May 2023 – Dec 2024

Qinghai University Financial Development Research Center — long-term support on data processing, literature review and report writing for funded projects.

SUMMARY

Strong competency in cross-disciplinary integration and innovation in the AI era. Dependable and pragmatic, I enjoy solving problems end-to-end and am willing to fill any knowledge gap to drive progress. Research and competitions have honed my data analysis, programming and complex problem-solving skills, and I adeptly turn cutting-edge tools such as LLMs into efficiency gains. Rigorous, efficient and collaborative, I am committed to being a pragmatic professional who drives future business growth.
